

THOMAS DOMASK

Waukesha, WI | (414) 852-0201 | tjdmask@yahoo.com | linkedin.com/in/thomas-domask-cs | tjdmask23.github.io

Digital adoption specialist with a computer science and business-systems background. Years spent translating business requirements into working systems, now focused on the harder half — making sure people can actually use them. Builds in-application guidance and partners with process owners across the enterprise to ship adoption content faster.

PROFESSIONAL EXPERIENCE

Digital Adoption Specialist — Rockwell Automation, Global Commercial Operations

Oct 2025 – Present

WalkMe · HTML5/CSS3 · JavaScript · jQuery · Seismic · Salesforce · Anaplan · Jira · PowerBI

- Build in-application WalkMe guidance that walks users through internal enterprise tools, converting software people avoid into software they can navigate without support tickets.
- Authored roughly half of all new digital-adoption content the team has shipped since joining, ranking among the team's most productive builders in the role's first stretch.
- Restructured the team's work intake and assignment model, clearing backlog faster and eliminating duplicated effort by assigning a clear owner to every task.
- Partner directly with process owners and stakeholders to diagnose where adoption breaks down, then design targeted guidance that resolves those specific failure points.
- Earned WalkMe Builder Level 1 and Level 2 certifications.

Business Systems Analyst — Rockwell Automation, Sensing, Safety & Industrial Components

Jul 2023 – Oct 2025

Jira · Jira Align · PowerBI · Workday Adaptive · Agile (Scrum/Kanban) · Lean Six Sigma

- Drove a 30% increase in Jira standardization across business-unit teams, enhancing collaboration and operational efficiency.
- Led the Application Lifecycle Management Tools Community of Practice, serving 200+ team members through monthly knowledge-sharing sessions.
- Developed comprehensive documentation and training programs for tooling-standards implementation across the entire division.
- Applied Lean Six Sigma methodologies to reduce process waste by 25% while earning Transitional Yellow Belt certification.
- Analyzed and standardized practices across 5 enterprise platforms (Jira, Jira Align, Workday Adaptive, PowerBI, Jama) to establish business-unit protocols.

Full-Stack Developer — Tixplorer.com (Remote)

Mar 2023 – Jul 2023

JavaScript · TypeScript · React · React Native · HTML5/CSS3 · AWS

- Executed the complete software development lifecycle from concept to deployment, delivering 15+ feature implementations and bug fixes.
- Developed scalable web applications using modern JavaScript frameworks, improving application performance by 40%.
- Collaborated with the Product Owner to prioritize and resolve 25+ critical bugs in production.

IT Administrator & Programmer — Industrial Refrigeration Consortium, UW-Madison

Jan 2023 – May 2023

PHP · HTML5/CSS3 · SQL · JavaScript · REFPROP10

- Resolved 20+ critical bugs in the IRC website following the REFPROP10 update, restoring full functionality to research tools.
- Conducted comprehensive testing and debugging, achieving 99.9% uptime for consortium web services.
- Provided technical expertise and support to 50+ researchers across multiple academic institutions.

Computer Science Instructor — Juni Learning (Remote)

Dec 2021 – May 2022

Python · JavaScript · HTML5/CSS3

- Delivered advanced computer science instruction to 25+ students ages 8–18, covering data structures and applied programming.
- Maintained detailed progress tracking across multi-course student journeys, achieving a 95% retention rate.

Quality Assurance Intern — Batteries Plus

May 2021 – Aug 2021

JavaScript · SQL · Postman · Agile (Scrum)

- Contributed to 50% of the team's QA workload, ensuring quality standards for POS system implementations across an Agile development team.

EDUCATION & CERTIFICATIONS

B.A., Computer Science — University of Wisconsin-Madison

May 2023

Certifications: WalkMe Builder Level 1 & Level 2 | Lean Six Sigma Transitional Yellow Belt

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, SQL, HTML5/CSS3, Java, C/C++

Frameworks & Tools: React, React Native, jQuery, Node.js, Git, GitHub, VSCode, Postman, AWS

Adoption & Business Platforms: WalkMe, Seismic, Salesforce, Anaplan, Jira, Jira Align, PowerBI, Workday Adaptive, Jama

Methodologies: Agile (Scrum/Kanban), Lean Six Sigma, Application Lifecycle Management
