PROFESSIONAL EXPERIENCE

Business Systems Analyst

July 2023 – Present

Rockwell Automation, Inc. | Milwaukee, WI

Technologies: Jira Software, Jira Align, Microsoft PowerBI, Workday Adaptive, Agile (Scrum/Kanban), Git, GitHub, M365 Suite

- Achieved **30% increase** in Jira Software standardization across business unit teams, enhancing collaboration and operational efficiency
- Led Application Lifecycle Management Tools Community of Practice serving **200+ team members** through monthly knowledge-sharing sessions
- Developed comprehensive documentation and training programs for tooling standards implementation across entire Sensing, Safety and Industrial Components division
- Applied Lean Six Sigma methodologies to reduce process waste by **25%** while earning Transitional Yellow Belt certification
- Facilitated Agile Transformation initiatives as designated Kanban Facilitator, streamlining workflows for cross-functional development teams
- Analyzed and standardized practices across 5 enterprise platforms (Jira, Jira Align, Workday Adaptive, PowerBI, Jama) to establish business unit-wide protocols

Full-Stack Developer

March 2023 – July 2023

Tixplorer.com | Madison, WI (Remote)

Technologies: JavaScript, TypeScript, React, React Native, HTML5/CSS3, AWS, VSCode

- Executed complete software development lifecycle from concept to deployment, delivering **15+ feature implementations** and bug fixes
- Developed scalable web applications using modern JavaScript frameworks, improving application performance by **40%**
- Collaborated with Product Owner to prioritize and resolve **25+ critical bugs** in production environment
- Implemented responsive design principles and AWS cloud services to enhance user experience across multiple device platforms

IT Administrator & Programmer

January 2023 – May 2023

Industrial Refrigeration Consortium, UW-Madison | Madison, WI

Technologies: PHP, HTML5/CSS3, SQL, JavaScript, REFPROP10 Integration

- Resolved **20+ critical bugs** in IRC website following REFPROP10 update, restoring full functionality to research tools
- Conducted comprehensive testing and debugging protocols, achieving **99.9% uptime** for consortium web services
- Provided technical expertise and user support to **50+ researchers** across multiple academic institutions
- Delivered clean, well-documented code solutions that improved system reliability and maintainability

Computer Science Instructor

December 2021 – May 2022

Juni Learning | San Francisco, CA (Remote)

Technologies: Python, JavaScript, HTML5/CSS3, Zoom Platform, Educational Technology

- Delivered advanced computer science instruction to **25+ students ages 8-18**, covering data structures and applied programming concepts
- Maintained detailed progress tracking records for multi-course student journeys, achieving **95% student retention rate**
- Adapted curriculum delivery methods to individual learning styles and interests, resulting in measurable skill progression

Quality Assurance Intern

May 2021 – August 2021

Batteries Plus Bulbs | Hartland, WI

Technologies: JavaScript, SQL, Postman, M365 Suite, Agile (Scrum), VSCode

- Contributed to **50% of QA workload** within Agile development team, ensuring quality standards for POS system implementations
- Completed professional development in Postman API testing, SQL database management, and JavaScript programming
- Performed comprehensive testing protocols for new code implementations, identifying and documenting critical issues

TECHNICAL PROJECTS

Personal Portfolio Website Independent Project

June 2024 – Present

Technologies: HTML5/CSS3, JavaScript, React, React Native, Responsive Design, VSCode

- Architecting modern web application using cutting-edge development methodologies and responsive design principles
- Implementing advanced CSS animations and JavaScript frameworks to create engaging, accessible user experiences
- Demonstrating proficiency in HTML5, CSS3, and modern web development tools for professional digital presence

EDUCATION & CERTIFICATIONS

Bachelor of Arts, Computer Science University of Wisconsin-Madison

May 2023

Certification: Lean Six Sigma Transitional Yellow Belt

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, PHP, SQL, HTML5/CSS3

Frameworks & Libraries: React, React Native, Node.js

Development Tools: Git, GitHub, VSCode, Postman, AWS

Business Applications: Jira Software, Jira Align, Microsoft PowerBI, Workday Adaptive, Jama

Methodologies: Agile (Scrum/Kanban), Lean Six Sigma, Application Lifecycle Management

Microsoft 365: Advanced proficiency in Word, Excel, PowerPoint, Teams, SharePoint, OneNote
